

**When choosing a place to live, what do you consider most important: location, size, style, number of rooms, types of rooms, or other features?**

When choosing a place to live, I consider many things such as location, size, style, number of rooms, etc. Each characteristic plays an important role for the value of the house/land or for the need's owner. Among them, in my opinion, location and the size are the important characteristic I consider.

I think that location is the most important factor. If we have a good location, just like our house is on the main street, we could do business with this location and earn more money from that. If we have a good location like nearby school, our children will don't take more time to go school. If we have a good location like nearby the hospital, we could solve some ambulance situation right away when having problem with health. If we have a good location like nearby the working place, we could save time to go to work without being afraid of the traffic jam.

The second characteristic is the size of the house / land in which I will live. The house/land with large size will be easy designed to become a beautiful and romantic place with all functions such as gara, flower garden, swimming pull, ect.

That are the factors I will consider when choosing the place for living. However, it still another important factor to affect on the decision to choose the place of living. It is not belong to the house / land, but it will play an important role for my making decision. That is the financial ability, the money to buy this house/land. In reality, I will base on the financial ability to choose the place for living. Maybe with the small money, I can not have the place as I dream, but it will suitable with me and I will happy to that house.

### Revised

In sum, there are a lot of factors affect~~ing on~~ the decision to choose ~~the a~~ place for ~~leaving living~~. But above of all, ~~the~~ financial ability is the most important and ~~the the second the~~ location and the size of ~~that the~~ house/land is the second.

When choosing a place to live, I consider many things<sub>1</sub>, such as location, size, style, number of rooms, etc. Each characteristic plays an important role for the value of the house/land or for the ~~need's~~ owner's need. Among them, in my opinion, location and the size are the important characteristic<sub>s</sub> I consider.

I think that location is the most important factor. If we have a good location, just like our house is on the main street, we could do business with this location and earn more money from that. If we have a good location<sub>1</sub>, like nearby a school for instance, our children will ~~don't~~ take ~~more-less~~ time to go to school. If we have a good location<sub>1</sub>, like nearby the hospital, we could solve some ambulance situation<sub>s</sub> right away when having problem<sub>s</sub> with our health. If we have a good location<sub>1</sub>, like nearby the working place, we could save time ~~to go~~ ing to work without being afraid of the traffic jam.

The second characteristic is the size of the house / land in which I will live. The house/land with a large size will be easi<sub>l</sub>y designed to become a beautiful and

romantic place with all functions such as a garage, flower garden, swimming pool, ect.

~~These~~ are the factors I will consider when choosing the place for living. However, ~~it~~ there is still another important factor ~~to~~-affecting ~~on~~-the decision ~~to~~-~~choose~~-~~about~~ the place of living. It is ~~not~~-belong ~~to~~not a matter of the house / land, but ~~it~~-~~will~~ plays an important role ~~for~~-~~my~~in making any decision. That is the financial ability, the money to buy ~~this~~-house/land. In reality, ~~I~~-~~will~~my decision will be based on ~~the~~-financial ability. ~~to~~-~~choose~~-~~the~~-~~place~~-~~for~~-~~living~~. Maybe with ~~the~~-~~small~~little money, I ~~can~~-~~would~~ not have the place ~~as~~-I dream of, but ~~it~~-~~will~~would be suitable ~~with~~-~~for~~ me and I ~~will~~ would be happy ~~to~~-in that house.

In sum, there are a lot of factors affect ~~on~~-the decision ~~to~~-~~choose~~-~~the~~-~~place~~-~~for~~-~~leaving~~-~~about~~-~~where~~-~~to~~-~~live~~. ~~b~~-But above of all, ~~the~~-financial ability is the most important and the second the location and the size of that house/land.

Nice essay. Review the use of 'would' for hypothetical situations in English. Usually 'would' is used instead of 'will.'
