

What those kids are doing

The bar chart shows the result of a behavior carried by a personnel department at a major company. It followed up on two groups of worker's age: 18-30 and 45-60, and shows elements affecting their work performance.

In total, aged 18-30 is affected by chance for personal development the most whereas money is the factor influencing strongly on aged 45-60.

In the 18-30 year old group, 90% of workers are willing to agree with the chance for personal development is the most important element affecting their job performance. In order, relaxed working environment and promotion prospects are the same important factors with 80%. In this group, the elements, job security and respect from colleagues, are less important at around 40%. Finally, the least important factor is work environment, at just 30%.

As the same time, aged 45-60 is influenced by money the most with 70%. The followed position is team spirit, at 60%. Next, competent boss, promotion prospects and job satisfaction are less important elements with around 50%. In summary, only 20% of respondents think work performance is affected by job security which is the least effect in this group.

Revised

The bar chart shows the results of a behavior survey carried out by a personnel department at a major company. It followed up on two groups of worker's aged: 18-30 and 45-60, and shows elements affecting their work performance.

In total, the group aged 18-30 is affected by chance for personal development the most whereas money is the factor influencing most strongly on the group aged 45-60.
