

Many people believe the modern obsession with fashion is a cause of discontent. To what extent do you agree?

Is it amazing that half of the world's population go shopping everyday? Nowadays, having more choices in clothing turns into a heated issue that whether or not it is a good development. From my perspective, choices in fashion helps people look and live much better but many get obsessed with clothes which leads them to heavy debt.

First of all, more selections with clothes make people look better which encourage them to the greater confidence. Report shows that 95% of people believe that how they dress is essential to their occupations, social relationships and so on.

In addition, good choices in clothing means of having more malls, more factories, more companies. It is undeniable that the number of workers in those places increase sharply every year. According to Ms. Lauren, a famous designer, states that thanks to the growth of fashion industry many unemployed now have jobs and lives.

On the other hand, as there are more styles of clothes, many become addictive and not all of them can pay for the shopping bills. It is stated that percentage of people go shopping with debit cards reach 97.98% which almost all confess themselves as "shoppaholic". And with debit cards, the debt grows until they have no other way but sell their own houses.

In conclusion, the way of dressing gives people confidence and better lives but also has its drawback. In my point of view, the development of fashion is good if only people know how to make it a advantage.

Isn't it amazing that half of the world's population goes shopping everyday? Nowadays, having more choices in clothing is turning into a heated issue that and whether or not it is a good development is uncertain. From my perspective, choices in fashion helps people look and live much better but many get obsessed with clothes, which leads them into heavy debt.

First of all, more selections with clothes make people look better which encourages them to have the greater confidence. Reports shows that 95% of people believe that how they dress is essential to their occupations, social relationships and so on.

In addition, good choices in clothing means of having more malls, more factories, and more companies. It is undeniable that the number of workers in those places increases sharply every year. According to Ms. Lauren, a famous designer, states that thanks to the growth of the fashion industry many unemployed now have jobs and lives.

On the other hand, as there are more styles of clothes, many become addictive-addicted and not all of them can pay for the shopping bills. It is stated that the percentage of people who go shopping with debit cards reached 97.98%, which while almost all confess themselves as "shoppaholics". And Besides, with debit cards, the debt grows until they have no other way but to sell their own houses.

In conclusion, ~~the way of~~ dressing gives people confidence and better lives but also has its drawbacks. In my point of view, the development of fashion is good if only people know how to ~~make it atake~~ advantage of it.

Your content is good, as is your organization. However you made too many tense errors (3rd person) and chose the wrong word form a number of times. Good luck! Just be careful to use structures you know and then proofread. Less translation! Also, avoid the use of the phrase, 'and so on.' Better to complete the thought with 'and many other aspects of their lives.'

Formatted: Superscript
