

**SOME PEOPLE SAY THE GOVERNMENT SHOULD NOT PUT MONEY IN THE ARTS, SUCH AS MUSIC, OPERA AND PAINTING, BUT INSTEAD SHOULD SPEND MONEY ON CONSTRUCTION OF PUBLIC FACILITIES. IN WHAT EXTENT DO YOU AGREE OR DISAGREE?**

It is generally accepted that the system of public facilities is paramount important in our society but, the role of kind of entertainments such as music, opera and so forth can not be denied. For this reason, I partly agree with this statement. There are a plenty of convincing arguments to support my perspective.

Admittedly, it is right ways in which the government has spent as much money as on erection of public facilities. The public transports are extremely important for moving of population and constructing the suitable system public transports that of it would aid to decrease the traffic congestion, for instance. Besides, the government should concentrate on building the electrical grid as well that will provide the electric power to remote areas on the wide nation.

However, there is a tendency to believe that the different types of entertainment might not able to be got rid of our lives even if whenever or wherever on the wide whole world. In some angle, it could be also known as the facilities for raising the living standard. They make our lives more comfortably and to build up the spiritual life for everyone. At the every weekend, the whole family could go to the cinema or that sort of things together those with will burnt of the stress and reduce an anxiety which built up in during the week, for example.

Moreover, the architectures of either theatres or opera not only have been proud of its country's population but also they might show the country's culture as well as the country's symbol, for instance, the opera house of Australia and the large number of well known theatres, galleries and opera around the world. There fore, the government should spend money on construction them as soon as possible.

In conclusion, I think that my point of view is decent clear, thus there is no need further argument. The government should not put money in the arts and

should spare the money for the public facilities. They completely live side by side very comfortable.

Not a good idea in an IELTS essay!] The government should not put money in the arts and should spare the money for the public facilities. They completely live side by side very comfortable.

The organization and content are good but there is still to much direct translation of Vietnamese idioms. You need to write in simpler English sentences that you connect with linking words....or you won't get a good score.
