

In the future, we will have more and more leisure time as machines replace many of the tasks we do at home and at work. Discuss the benefits this will bring and also the problems it will cause.

In recent decades, technology has been developing rapidly. Machines replace many of tasks which we do at home and at work such as washing clothes and dishes, managing products, discovering new planets. Because of this, we will have more and more free time. Of course, machines bring many benefits to people.

First of all, we will not do housework as much as we used to when vacuum cleaners, washing machines appear. Also, we will not have to spend much time washing clothes, cleaning our house. Moreover, we do not have to take of the garden because robots will do everything. Because of the appearance of robots, parent will have more time to spend with their children.

Secondly, machines will replace many of tasks in business. With computers, we can contact with everyone easily. In the future, people will find it easier to expand their markets. Furthermore, computers are very important in accountancy. Because they can calculate exactly, accountants depend on this very much and rarely make mistakes.

However, although machines bring many benefits to us, they also cause many problems. People become lazier because machines do everything. Moreover, machines are the reason why people find it easy to get fat because in the future, we will not do housework by ourselves. Furthermore, people will get lazy to think. For example, children use more computers to do exercises. With lot of software in computers, children can copy materials from anyone.

Overall, although machines cause some problems, we can deny that they are so important that we cannot depend on them. We should have plans to use machines reasonably. We should do something by ourselves such as household so that we can keep my health better.

Revised

In recent decades, technology has been developing rapidly. Machines have replaced many of the tasks which we do at home and at work such as washing clothes and dishes, managing products, and discovering new planets. Because of this, we ~~will~~ have more

and more free time. ~~Of course~~ Put simply, machines ~~bring~~ have brought many benefits to people.

First of all, we ~~will do~~ not do housework as much as we used to ~~when~~ before vacuum cleaners ~~and~~ washing machines appeared. Also, we ~~will do~~ not have to spend as much time washing clothes, ~~or~~ cleaning our house. Moreover, in the future we will ~~we do~~ not have to take care of the garden because robots will do everything. Because of the appearance of robots, parents s will have more time to spend with their children.

Secondly, machines will ~~replace~~ perform many of the tasks in business. With computers, we ~~can~~ will contact with everyone easily. In the future, people will find it easier to expand their markets. Furthermore, computers are very important in accounting ancy. Because they can calculate exactly, accountants depend on this very much and rarely make mistakes.

However, although machines bring many benefits to us, they also cause many problems. People become lazier because machines do everything. Moreover, machines are the reason why people find it easy to get fat because in the future, we will not do housework by ourselves. Furthermore, people will ~~get~~ too lazy to think. For example, children will use more computers to do exercises. With lot of software in computers, children ~~can~~ will copy materials from anyone.

Overall, although machines cause some problems, we can not deny that they are ~~so~~ important ~~that~~ and we ~~cannot~~ must depend on them. We should have plans to use machines reasonably. We should do something by ourselves such as household so that we can keep my health better.

Good length, and your sentence variety is excellent. Be careful with tenses. Notice the use of present perfect for changes going on in the past that have continued to the present. Be consistent with 'present' and future. Overall, very good....just take care with verbs.
