

**The only way to reduce the traffic in cities today is by reducing the need for people to travel from home for work, education or shopping. To what extent do you agree or disagree?**

Some people contend that there is only one way to reduce the traffic jam in cities is by decreasing people's demand to travel from home for work, education or shopping but I am of the opinion that there are also other solutions for this problem and I would like to illustrate it in this essay:

Let me begin by pointing out that there are another way to improve the traffic in cities is encourage people to use public transportations. There are some public transportations that are very convenient and can help to reduce the traffic problem now such as buses, subways,... The government should invest more on subways system or improve the quality of buses system to increase the number of people using public transportations

Another solution worth noting is that the government should pay attention to infrastructure. It is impossible to have a better traffic but in bad roads, this is the basic facilities that one city need to upgrade. If the city is in permission condition then we should make the roads better, open some new routes, built more bridges and have a city land use planning in order to create the best infrastructure and also to reduce the bad traffic in some cities.

Admittedly, it is also true that decreasing people's demand to travel from home for work, education or shopping is one of the interesting ways to reduce the traffic jam. This can become a better solution if we can satisfy the need of people at home such as telecommute or self –educated or food delivery ... I believe that this is a good idea but we will face a lot of problems to make this reality.

It is clear that there are a lot of ways to decrease the traffic in cities today and instead of reducing the need for people to travel from home for work or shopping, we can encourage people to use public transportations and pay more attention to the infrastructure in order to have a better traffic.

## Revised

Some people contend that ~~there is~~the only one way to reduce the traffic jam in cities is by decreasing people's demand to travel from home for work, education or shopping but I am of the opinion that there are also other solutions for this problem and I would like to illustrate ~~it~~them in this essay:

Let me begin by pointing out that ~~there are~~ another way to improve the traffic in cities is to encourage people to use public transportations. There are some forms of public transportations that are very convenient and can help to reduce the traffic problem now, such as buses, ~~and~~ subways, ~~...~~. The government should invest more ~~on in~~ subways systems or improve the quality of the ~~buses~~ system to increase the number of people using public ~~transportation~~transportation.

Another solution worth noting is that the government should pay attention to infrastructure. It is impossible to have ~~a~~ better traffic ~~but in~~with bad roads, so this ~~these is are~~ the basic facilities that ~~one a~~ city needs to upgrade. If the city ~~is in permission condition~~ is able to do it, then ~~we it~~ should make the roads better, open some new routes, built more bridges and have ~~a~~ city land use planning in order to create the best infrastructure and also to reduce the bad traffic ~~in some cities~~.

Admittedly, it is also true that decreasing people's demand to travel from home for work, education or shopping is one of the interesting ways to reduce the traffic jam. This ~~can~~ could become a better solution if we ~~can~~ were able to satisfy the needs of people at home ~~such as~~ by means of ~~telecommute~~ telecommuting or self ~~educated~~ education or food delivery ~~...~~. I believe that this is a good idea but we will face a lot of problems to make this reality.

It is clear that there are a lot of ways to decrease the traffic in cities today and instead of reducing the need for people to travel from home for work or shopping, we ~~can~~ should encourage people to use public transportations and pay more attention to the infrastructure in order to have ~~a~~ better traffic.

Nice job. In IELTS, use should never use ellipsis (...). Always use words, like 'and so on'. Note that permission condition is a direct translation that isn't clear in English...
