Task 1

You should spend about 20 minutes on this task.

The graph below shows the contribution of three sectors – agriculture, manufacturing, and business and financial services – to the UK economy in the twentieth century.

Summarize the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

Year	Agriculture (%)	Manufacturing (%)	Business and Financial (%)
1900	49	45	6
1950	52	38	10
1975	10	33	20
2000	2	15	35

Task 2

You should spend about 40 minutes on this task.

Write about the following topic:

To some people studying the past has little value in the modern world. Why do you think it is important to do so? What will be the effect if children are not taught history?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

8.54 x 11.73 in

The graph shows the contribution of three sectors including agriculture, manufacturing and business and financial services to the UK economy in the twentieth century. During 100 years, there were a lot of changes in playing a role of each sector on UK economy contribution.

Agriculture ran a main role in 1900 and 1950 when it increased steadily from 49% to around 52%. However, in 1975, it slumped to 10% and dropped quickly to 2% in 2000.

Manufacturing kept the second high position in UK economy in 1900 with 45% but fell suddenly to 38% in 1950. Even though it continued dipping to 33% in 1975, at

that time, it was the main sector in contribution. A quick decline happened in 2000 when manufacturing dropped to almost 27%.

In the beginning of the twentieth century, Business and Financial stood at 3% and climbed swiftly to 10% in 1950. This sector kept going up quickly to 22% in 1975 and rose rapidly to 36% in 2000, which was in charge as the main sector in UK economy.

Revised

The graph shows the contribution of three sectors including agriculture, manufacturing and business and financial services to the UK economy in the twentieth century. During 100 years, there were a lot of changes in ~~playing at the contribution role~~ of each sector ~~to the~~ UK economy. ~~contribution.~~

Agriculture ~~ran played~~ a main role ~~inbetween 1990-1900~~ and 1950 when it increased steadily from 49% to around 52%. However, in 1975, it slumped to 10% and ~~then~~ dropped quickly to 2% in 2000.

Manufacturing kept the second high position in UK economy in 1990 with 45% but fell suddenly to 38% in 1950. Even though it continued dipping to 33% in 1975, at that time, it was still the main sector in contribution. A quick decline happened in 2000 when manufacturing dropped to almost 27%.

~~In~~ At the beginning of the twentieth century, the Business and Financial sector ~~[or business and finance]~~ stood at 3% and climbed swiftly to 10% in 1950. This sector kept going up quickly to 22% in 1975 and rose rapidly to 36% in 2000, which ~~was in charge as~~ made it the main sector in the UK economy.

Excellent. Perfect length, and you use the trend language very well. You also have enough comparison language. Be careful with direct translation from Vietnamese. You're only notable errors were in sentence structure.
