

Some people believe in the traditional idea that the woman's place is in home, while others say that idea is outdated and that women should play an important role in the workplace of the future. What is your opinion?

It is generally believed that "men build the house and women make it home". That is the reason why people always think the position of woman is in home. However, it is thought that women should go out to earn money. In my opinion, the stronger and the faster the society is developing, the more significant the role of women in work is.

First of all, in the past, people's life depended on the fields and the weather. In the other words, in order to get good life, people used their power to conquer nature as planting rice, hunting wild animal or fishing. Men have better strength than women. Furthermore, with the maternal instincts, women look after children and do household chores extremely well. Therefore, men went out to feed up their family.

On the other hand, today, the development of science and technology makes their life not rely on nature. That means that women can use their brain to get money like men. In reality, both men and women have paid jobs, and after working, they do household and take care of their children together.

Furthermore, women frequently can gain successfully in their career owing to their care and humane. For example, Hillary Clinton-wife of Bill Clinton who is the ex-president in the United State of American- is one of the famous politicians in the world who fight to protect women and babies. Moreover, the power of women is their smartness.

In conclusion, the traditional idea of the woman's place is out-of-date. As far as I am concerned, in the future, women will be successful in their job and have important role in their workplace.

Revised

It is generally believed that “men build the house and women make it a home”. That is the reason why people always think the position of the woman is in the home. However, it is also thought that women should go out to earn money. In my opinion, the stronger and the faster the society is developing, the more significant the role of women in work is.

First of all, in the past, people’s life depended on the fields and the weather. In ~~the~~ other words, in order to get a good life, people used their power to conquer nature ~~as-by~~ planting rice, hunting wild animals or fishing. Men ~~have-were known to have~~ better strength than women. Furthermore, with ~~the~~ir maternal instincts, women look after children and do household chores extremely well. Therefore, men went out to feed up their family.

On the other hand, today, the development of science and technology makes ~~their~~ life not so rely reliant on nature. That means that women can use their brain to get money like men. In reality, both men and women have paid jobs, and after working, they do household tasks and take care of their children together.

Furthermore, women frequently can gain success~~fully~~ in their career owing to their care and humanity. For example, ~~Hellary~~Hillary Clinton-wife of Bill Clinton, who is ~~the-an~~ ex-president in the United State of America~~n-~~ is one of the famous politicians in the world who fights to protect women and babies. Moreover, the power of women is their smartness.

In conclusion, the traditional idea of the woman’s place is out-of -date. As far as I am concerned, in the future, women will be successful in their jobs and have important roles in their workplace.

Good job! Nice sentence variety. Careful with quotes of sayings. “Make it home” without the article means arrive home....sounds like men build the house and women make it home... late at night after having a good time. Good length and organization too.
